

Secabo TC 5 heat press

With the Secabo TC 5 heat press all common heat transfer methods (flock, flex, sublimation, inkjet-flex, chromablast etc.) can be used professionally. The digital time and temperature controllers are used to adjust all settings. The pressure can be adjusted with a wheel on top of the heat press. The TC5 offers a very wide clam angle for easy and precise alignment of garments.

feature overview:

digital controllers

Time and temperature can easily be set and controlled by the digital controllers.

WarrantyPLUS optional

Optional Express Exchange Service WarrantyPLUS 12 or 24 months for a simple replacement of the device in case of damage.

big working space

With the high clam angle of 50° objects can be aligned precisely

variable pressure

the pressure can easily be adjusted - depending on the technology and object

safe use

The safety and quality of the machines is permanently controlled by German safety standards

exact temperature distribution

The high-quality heat plate ensures an exact temperature distribution over the whole heating plate

little hysteresis

The temperature controllers reduce temperature fluctuations to a minimum

technical data:

heat press:	Secabo TC 5
type:	clam heat press
working area:	38cm x 38cm
folding angle:	0° - 50°
max temperature:	260°C
max time setting:	9999s
max pressure:	250g/cm ²
pressure setting:	height adjustment of the heat plate by hand wheel
power supply:	230V / 50Hz - 60Hz, 2,20kW
environment:	+5°C - +35°C / 30% - 70% humidity
Weight:	34kg
dimensions (w x h x d):	39cm x 36cm x 68cm
scope of delivery:	heat press, cable, manual

available accessories:

Silicon mats for protection of transfer elements - Heat-resistant mats made of silicone can be used as an adjustment to unevenness and as protection for sensitive surfaces during the heat press process. Thickness: 1mm, available formats: 30cm x 40cm, 40cm x 40cm, 40cm x 50cm, 40cm x 60cm.

Heat plate protection with PTFE-coating - Self-adhesive, fiberglass film with PTFE-coating. As replacement for damaged or worn out, non-stick coated heat presses. Suitable for all common heat press models. Strength: 150µm. Available formats: 28cm x 38cm, 38cm x 38cm, 40cm x 50cm.

Exchangeable base plates - Exchangeable base plates are available in various formats for many Secabo heat presses. The base plate can be used by itself, mounted in place of the large base plates or it can be used in conjunction with the quick-change system. Available formats: 8cm x 12cm, 15cm x 15cm, 12cm x 38cm, 20cm x 30cm, 38cm x 38cm, 38cm x 50cm (TC D7), 40cm x 50cm (TS 7), 50cm x 40cm (TC 7).

Quick-change system for exchangeable base plates - The quick-change system allows up to three exchangeable base plates to be mounted next to one another (depending on the model of heat press) and changed within seconds. The quick-change system is available for the following heat press models: TC 5, TC 7, TC D7 (up to 2 x 3 exchangeable base plates).

cross laser - Mit den flexibel einsetzbaren Kreuzlasern von Secabo lassen sich sowohl Textilien und andere Objekte als auch Transfer Elemente wie Flexfolien, Sublimationspapiere u. ä. einfach und reproduzierbar positionieren. Erhältlich als Tisch- und Standversion, jeweils mit einer oder zwei Kreuzlaser-Dioden.
